

Nick's Shopping Spree Wish Granted!

Nick is a happy, fun-loving 14 year old boy who lives in North Kingstown, RI and has decided that a shopping spree wish would be the perfect wish for him! Nick was not looking to go on a shopping spree for clothes, he would rather buy items such as a TV and stereo and game systems to make his room extra fun! Nick did some research and realized that he had enough money in his shopping spree budget to purchase paint, a new futon, video game chair and dresser! When Cardi's Furniture found out about his need for new furniture, they decided that they wanted to be a part of this special wish and donate the items!

Nick wanted his room to be his special haven where he can go to after a long day and relax but at the same time he wants his room to serve as a "cool hang-out" when his friends come over to visit. His wish granter also went a step further and connected with a company that is donating a wall mural of Nick's favorite artist Eminem. Although Nick suffers from a life threatening illness, called hypogammaglobulinemia, he is a typical teenage boy who loves to be with his friends, play video games, watch movies and listen to music.

Hypogammaglobulinemia is a disorder in which the body's immune system does not make antibodies, or makes a reduced amount of antibodies. Nick's immune system is severely impaired and impacts all aspects of his life. Because of his medical condition and him being a high risk of getting sick, he spends a lot of time at home, rather than being out in crowds. Nick's bedroom makeover will provide him with a great place to hang out, relax and have a couple friends over.

Children's Wishes and Cardi's were very excited to have the opportunity to put a smile on Nick's face and help him create a room that will bring him happiness. We are proud to have granted Nick's wish with love!
